**(NO INCLUYE LENTE)**

**WDR (Wide Dynamic Range)**

WDR technology provides vivid colors without losing any brightness, when the brightness of an object is relatively low and the light is projected at a high area.

**580TVL Ultra High Resolution**

Delivering a superior image quality of 580TVL in Color and 600TVL in Black/White.

**High Sensitivity True D&N**

Loaded with Day/Night feature to deliver the sharpest picture even in very low ambient lighting.

**Eclipse function**

Eclipse feature blocks any unnecessary lights.

**3-DNR**

Built-in noise reduction technology of Blue-i provides the most reliable images through effectively reducing noise under low-light conditions.

**Stabilizer**

Built-in stabilizer technology compensates images from an unstable camera movement.
